FOR IMMEDIATE RELEASE

BATTERY POWERED HEAT GUN AND SOLDERING IRON KIT FOR BATTLE DAMAGE REPAIR HAS BEEN APPROVED BY ARMY AVIONICS

United States Army Avionics has recently approved the Malcom Company MCH-100-A, Battery Powered Portable Heat Gun, for their new Battle Damage Assessment Repair Kit.

The portable battery powered electric heat gun MCH-100-A, manufactured by Malcom Company of Portsmouth, Rhode Island, features a light weight battery powered self contained heat gun, battery powered soldering iron, power supply using BB390 military approved batteries and a heavy duty carrying case with shoulder strap.

Numerous heat gun nozzle accessories are available for all hot air tool applications in the field including; cable and harness repair, electronics repairs, plastic welding, tent, awning, and tarp repairs.

The MCH-100-A hot air tool is versatile, efficient, and easy to use. The MCH-100-A is currently deployed with our Armed Forces, on land and sea, each day across the globe.
